PROFESSIONAL SUMMARY

Aspiring Artificial Intelligence and Data Science student with hands-on experience in Machine Learning, Data Analysis, Data Visualization, and Dashboard Development. Skilled in building predictive models, performing data preprocessing, and deriving actionable insights from complex datasets. Strong foundation in Python, SQL, and data analysis tools. Seeking internship opportunities to apply technical skills and gain industry experience in Data Science, Analytics, and AI domains.

EDUCATION

B. Tech - Artificial Intelligence and Data Science

St. Joseph's Institute of Technology | CGPA: 8.3/10 | Expected Graduation: 2028 | Current Year: Second Year

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Data Cleaning, Exploratory Data Analysis (EDA)

Machine Learning: Classification Models, Predictive Analytics, Model Evaluation, Feature Engineering

Tools & Platforms: Jupyter Notebook, VS Code, GitHub, Microsoft Excel.

INTERNSHIP EXPERIENCE

Kodbud - Remote Intern :-

- Assisted in project development and implementation tasks.
- Worked with Python-based applications and problem-solving activities.
- Gained practical industry exposure through remote collaboration.

PROJECTS

Paint Detection System

- Developed a machine learning model for paint defect detection and classification. Performed comprehensive data preprocessing and feature analysis. Evaluated model performance using various classification metrics and achieved high accuracy in defect identification.

Loan Approval Prediction

- Built a predictive model using historical loan datasets to determine loan approval outcomes. Conducted extensive data cleaning, feature engineering, and model training using multiple machine learning algorithms. Successfully predicted loan approval with optimized model performance.

Fashion MNIST Classifier

- Developed an image classification model using the Fashion-MNIST dataset for clothing category prediction. Applied advanced machine learning techniques and neural networks. Evaluated and compared model accuracy across multiple classification algorithms.

COVID-19 Prediction

- Analyzed COVID-19 datasets to identify patterns and trends in pandemic progression. Built predictive models for forecasting COVID-19 outcomes. Created meaningful data visualizations to support analytical insights and trend analysis.

Amazon Product Review Sentiment Analysis

- Performed sentiment analysis on large datasets of Amazon customer reviews. Applied text preprocessing techniques and machine learning algorithms for classification. Successfully classified reviews into positive and negative sentiments with high accuracy.

DASHBOARD PROJECTS

Department-wise Student Analysis Dashboard

- Developed an interactive and user-friendly dashboard to analyze student performance across multiple departments. Visualized comprehensive student statistics including pass percentages and academic trends. Enabled department-wise comparison through interactive charts and dynamic filters.

Sales Dashboard

- Created a comprehensive analytics dashboard for analyzing sales data and overall business performance metrics. Visualized sales trends, revenue distribution, and product performance across different segments. Generated actionable insights through interactive reports and advanced visualizations.

CERTIFICATIONS

- Data Science Foundation Certification
- SQL 101 Certification
- Machine Learning Foundation Certification
- NPTEL - Python for Data Science

SOFT SKILLS

Problem Solving | Analytical Thinking | Communication | Team Collaboration | Time Management | Attention to Detail | Critical Thinking
